Dear Tim,

RENSHADE perforated foil blinds in LITHUANIA

Firstly let me thank you for all the advice, nice cooperation and totally perfect product!

It's definitely colder in my studio and I don't need to keep air conditioner on all day long. I'm promoting your product in the same business center where I'm working and planning to spread message wider.

Please find attached a picture of my work.

As I explained to you earlier, I originally had two blinds, a simple one close to the window and a second one being a perforated fabric rolling blind which was meant to stop the summer heat coming in, but never worked properly. I decided to remove this second blind and replace with the perforated RENSHADE rolling blinds.

So now again I have two blind layers, the simple blind close to the window and the RENSHADE rolling blinds facing into the apartment. Thank you for helping me achieve a big improvement in keeping cooler and maintaining views to outside.

With freight, I organised and paid "DHL" because it was much lower than the price quoted to Wren.

Best wishes,
Antanas
